

Control panel

Heat pump

Cabinet heater

8.04.00 Control systems, electrical control panels

Backer's steering panels are developed to improve communication between consumer and final system. The maintenance of the product is easy; it doesn't require specialist knowledge or skill. All functions are accessible from simple interface which provides simple ways of control for a wide range of products.

>> Material

Galvanized steel
Stainless steel
Plastic

>> Dimension

According to customer requirements and dependent on function

>> Fields of application

Heating and air-condition systems
Domestic boilers
Electric water heaters

>> Assembly

Depending on application

>> Connection

The panels are ready to install by different types of connections, cables and terminals; modular and flat cables, receptacles, round pins, edge connectors etc.

>> Control/quality

Every panel is tested electrically according to EN 60335-1 and produced peacefully from ROHS Standard. Build in temperature cut-off, auto fuses, overheating relays.
