Cabinet heater

## 9.03.00 Cabinet Heaters

Cabinet heaters are used to prevent moisture and condensation in cabinets, electrical plants and electronic information boards. Cabinet heaters are designed for optimal heat emission. The surface temperature of the heater is low, enabling a safe position near other electronic equipment. The cabinet heater is furnished with a temperature limiter and fulfils protection class IP55. Connection cable with length 0.5 m included. Accessories for assembly on a DIN bar are ordered separately.

### >> Material

Black anodised aluminium

### >> Dimension

75 x 72x 57 mm
