

BRAUDE CORROSION RESISTANT CONTROLLERS

Description

There is a full range of Braude temperature and liquid level controllers, protection and cut-out devices to be used in conjunction with our heaters. All controllers are supplied complete with sensors designed for use in process tanks, so they are protected from attack by aggressive chemicals or by mechanical damage from workload in the tank.

Our controllers are designed for arduous applications in processing plants, and most come in IP65 enclosures for surface mounting near the point of application. Clear displays ensure ease of use.

They can also be used in conjunction with our custom built control panels to complete our range of safety, monitoring and control solutions.

Fields of Application

- Electroplating
- Electroless Plating
- Chemical Polishing
- Hard and Soft Anodising
- Frost Protection for Chemical Tanks
- Marine Water
- Acid Pickling and Etching
- Chemical Milling

Benefits

- 240V or 110V mains operation
- Simple to install
- Easy connections
- 2 & 3 wire relay output
- Non-corrodable probes
- Sealed to IP65
- Clear displays
