

Description

Heating is nothing without control and our range of industrial products are engineered not only to provide our customers with the complete heating and control package, but also to provide the relevant components in order to build and maintain their own heating applications.

At Heatrod we offer a large range of industrial controls, from solid state contactors & relays to thermostats and temperature controllers.

Fields of Application

- Steel strip Wire & Tube pickling
- Metal Finishers
- Glass Producers
- Chemical Millers
- Aerospace Industry
- Galvanising
- Chemical Plants

Benefits

- 240V or 110V mains operation
- Simple to install, designed for surface mounting
- Easy connections with flying leads
- 2 & 3 wire relay output
- Non-corrodable probes
- Sealed to IP65
- Clear displays

Products

- Backer IoT Smart Controls
- Braude Corrosion Resistant Controllers
- Diamond H Controls
- Solid State Relays & Contactors
- Thermostats
