

HEAVY DUTY IMMERSION HEATERS

Description

The HRI Range of immersion heaters are designed specifically for high usage environments. This heater is ideal for use in water and chemical applications. With Incoloy 825 elements fitted as standard this heater offers resistance to aggressive liquids and hard water process applications.

Key features

- For use in water applications only*
- Incoloy 825 sheath (inc thermostat pocket)
- Single thermostat pocket
- IP68 outdoor rated heavy duty rotatable enclosure
- Flexible fitting and wiring options
- Dual function thermostat included
- Unique design offers both single and three phase installation
- Element diameter: 8mm
- Terminal Enclosure Conforms and Certified to IP55 | IP65 | IP66 | IP67 | IP68
- Other: Alternative mounting option available

*Contact us for recommendations for chemical and oil applications
