

BRAUDE

Acid proof equipment

- tank and vessel heaters
- tank and vessel coolers
- chemical service pumps
- electric heaters
- controllers
- external heating systems

BRAUDE

Specialists in heating and cooling systems
and equipment for highly corrosive liquids

**Braude are specialist manufacturers of heating and cooling systems
for highly corrosive liquids using high integrity fluoropolymer
materials for optimum chemical resistance.**

**Applications include any process
where aggressive chemicals are
heated, cooled or pumped, such as:**

- Chemical Processing
- Metal Finishing and Electroplating
- Anodising
- PCB Etching and Plating
- Stainless Steel Pickling
- Galvanising Pre – treatment
- Powder Coating
- Water Industry
- Steel, Wire and Tube Industry

**Braude equipment is also used where
the inert properties of the products
do not cause any contamination of
the solutions:**

- Fish Aquaria and Farming
- Biochemical Process
- Potable and pure Water Treatments
- Medical and Pharmaceutical

**Braude
equipment
will not corrode**

Braude range includes...

- **Polaris:** non corrodable electric immersion heater 0.5 to 18kW
- **Thermaster:** digital thermostatic controller to IP65
- **Levelmaster:** liquid level controller
- **Tankmaster:** combined temperature and level controller
- **Chemical transfer pumps:** self priming, select from a range of seals to suit the application
- **Nautilus:** tank heater and cooler for use with steam hot water, thermal fluid or chilled water
- **Jet Stream:** external tank heating and cooling system for use where heavy work-loads can damage internal tank heaters
- **Electrojet:** external electric heating system
- **Frogspawn:** thermal insulation spheres 10mm to 150mm
- **Chemical tanks and storage vessels:** in PP, CPVC, PVDF & GRP

**Braude equipment: designed
for use in aggressive chemicals**
